

Test Case Studies – DAY -1

- 1) Design minimum 10 project or product items.

Projects

1. Online Banking Management System — Manages customer accounts, fund transfers, deposits, withdrawals, and transaction history for a bank.
2. Hospital Management System — Manages patient registration, doctor appointments, medical records, billing, and hospital services.
3. Insurance Management System — Manages customer policies, premium payments, claims, renewals, and policy details for an insurance company.
4. College Student Management System — Manages student records, course registration, attendance, marks, fees, and academic information.
5. Library Management System — Manages books, student memberships, book issue/return, availability, and overdue fines.

Products

1. Amazon E-Commerce Platform — Allows users to search, purchase, pay for, and track products online.
2. Flipkart Online Shopping Platform — Provides product browsing, shopping cart, online payment, order tracking, and returns.
3. Myntra Fashion Shopping Platform — Allows users to browse fashion products, place orders, make payments, and manage returns.
4. Microsoft Teams Collaboration Platform — Provides chat, video meetings, file sharing, team collaboration, and online communication.
5. Google Drive Cloud Storage Platform — Allows users to upload, store, share, download, and manage files online.

Case Study :

Black Box test case design techniques

- 1) Equivalence Class partitioning: is done using invalid and valid conditions

Design Equivalence class partitioning for an application number field accepts 1 to 500 digits

Case Study - 1

S. No.	Normal Test Data	Divide Values into Equivalence Classes	Test Data Using ECP
1	First Name	Valid name / Blank value	Thejaswini / Blank
2	Last Name	Valid name / Blank value	Random / Blank
3	Email	Valid email format / Invalid email format / Blank value	theja@gmail.com / theja@ / Blank
4	Phone Number	Valid phone number / Invalid phone number / Blank or incomplete value	9876543210 / 98765 / Blank
5	Message	Text message / Blank value	I need more information. / Blank

Enter a valid e-mail address

Phone Number

(4_) _-__

Please enter a valid phone number.

Field value must fill mask

Message

Case Study - 2

S. No.	Normal Test Data Equivalence Class	Test Data Using ECP
1	Phone Number	
	Valid phone number	9876543210
	Invalid: Number is too short	123
	Invalid: Contains non-numeric characters	abcdefghij
	Invalid: Blank	Blank

Enter your phone number:

 ▼ 123

Verify

Invalid phone number 123: too short

Case Study – 3

S. No.	Normal Test Data	Equivalence Class	Test Data Using ECP
1	Name	Valid name	Thejaswini
		Invalid: Blank	Blank
2	Phone Number	Valid: Length ≤ 13	9876543210
		Invalid: Length > 13	98765432101234
3	Address	Valid: Address selected	(1) LS9 7QT
		Invalid: No address selected	No selection
